"As first time business owners, we were pretty uncertain if our Business Plan would be thorough enough to kick off with our idea. Thankfully though, after a review of our Business Plan, Nexis assured us we were very much on the right path and that opening our business was indeed a viable and profitable decision.

Nexis introduced us to a business lender, assisted us with obtaining finance and helped us to make an informed decision around which accounting software to use. They even assisted us with the setup of the software and were always available to help smooth out its use.

We were shown everything we needed to know about running our own business including operations, wages and dividends. We are truly grateful for all of their professional guidance in helping us begin as we may not have come as far as we have today without the help of Nexis Accountants and Business Advisors."
